1 Power Delivery 3.0 pass-through offers up to 100W of charging power utilizing the laptop's USB-C power adapter. USB-C power adapter not included.

2 Maximum of up to 85W of power can be delivered to the laptop after deduction of 15W used by the docking station. Pass-thru power delivered to the laptop is dependent upon the capacity of your USB-C power supply. Ex. If your USB-C power supply is 60W, then the maximum power can be delivered to the laptop is 60W-15W = 45W. If your power supply is 87W, then the maximum power can be delivered to the laptop is 87W-15W = 72W.

3 Only one additional video output is supported for extended desktop on macOS X.

Note: For best video performance direct connections are recommended. Adapters and converters are not guaranteed to function properly.
