#### 5x2 HDMI Matrix Switch

- |                           |                        |
|---------------------------|------------------------|
| 1. Port 1 LED (Red/Green) | 10. Power Adapter Port |
| 2. Port 2 LED (Red/Green) | 11. Input 1            |
| 3. Port 3 LED (Red/Green) | 12. Input 2            |
| 4. Port 4 LED (Red/Green) | 13. Input 3            |
| 5. Port 5 LED (Red/Green) | 14. Input 4            |
| 6. Output A LED (Red)     | 15. Input 5            |
| 7. Output B LED (Red)     | 16. Output A           |
| 8. IR Receiver            | 17. Output B           |
| 9. Power LED (Blue)       |                        |

#### Remote Control

1. Port 1
2. Port 3
3. Port 4
4. Output A
5. Port 2
6. Port 5
7. Output B

### Installation

#### STEP 1

Please make sure your HD TVs or displays and HD media source are powered off before you start.

#### STEP 2

Connect the power adapter to the power outlet and the HDMI matrix switch's power adapter port.

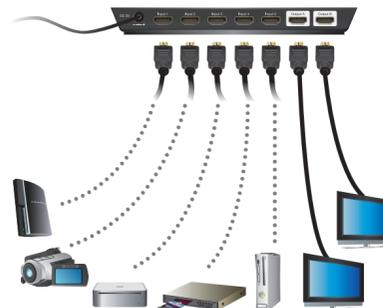

#### STEP 3

Connect HDMI cables to the input ports of your HD TVs and displays and the output ports of the HDMI matrix switch.

#### STEP 4

Connect HDMI cables to the output ports from the HD media sources and the input port from HDMI matrix switch.

#### Final Step

Turn on your HD media sources and HD TVs or displays.

Note: For DVI-D devices, for example, Mac Mini, a HDMI to DVI adapter (GHDMIFDVM, not included) is required.

### Remote Control

#### To switch input source on a display

Simply press Output A or B, then press port number as desire.

#### To swap input sources between 2 display

Please note that you cannot swap the 2 sources directly between 2 displays because 1 input on 2 displays is not allowed. Please see below example to swap input sources between 2 displays.

For Example:

**Current setting:**  
Output A on Port 1  
Output B on port 2

**Desire setting:**  
Output A on Port 2  
Output B on Port 1

Procedure:

1. Switch Output A to either Port 3, 4 or 5
2. Switch Output B to Port 1
3. Switch Output A to Port 2

### LED Indication

Input LED will light up with the color that matches the color of the Output LED. For example, if you have Output A using Input 1, Input 1 LED will light up in Green.
