PART NO. 00504

Welcome

Start Here!

Thank you for purchasing IOGEAR®'s HDMI Automatic Switch.

IOGEAR's patented HDAS automatic switching technology allows you to maintain a single Universal Remote to control your home entertainment center.

IOGEAR's patented HDAS automatic switching technology will automatically switch to the active device which eliminates the need for a dedicated remote for the switch. It's very simple – just turn on the device that you want viewed on your HDTV using a Universal remote or source remote. If you want to switch over to another source device, simply use the Universal remote or source remote to power on the desired device. In addition, since all the source devices will be connected to a single HDMI connection on the HDTV via the switch, it eliminates the need to manually switch among the AV inputs to display the video from the different source devices.

The 4-port HDMI Automatic Switch comes with an optional switch remote. The switch remote enables you to switch among the devices by selecting the desired video port.

A Learning Universal Remote can learn the functions of the switch remote. This way, at a press of a button, you can switch among devices without powering on and off the devices.

IOGEAR's HDMI switch is **HDCP™** Compliant and supports **1080p** resolution.

It is an **ideal solution** for connecting multiple HD digital content media devices such as video game consoles, media PCs, set top boxes from satellite or cable providers, DVRs, HD DVD players, A/V receivers and many more.

If you have a question, or in the unlikely event you do experience any difficulties, do not hesitate to let us know. We have a dedicated and trained support staff standing by to serve you. We're here to help!

Package Content

- 1 x 4-Port Automatic Video Switch
- 1 x Remote
- 1 x 6ft HDMI (Male-Male) Cable
- 1 x Power Adapter
- 1 x Quick Start Guide
- 1 x Warranty / Registration Card

INSIDE

HDMI Automatic Switch Overview

1. IR Receiver
2. Push button for manual video switching
3. Power Adapter Port
4. Output port
5. Input ports (x4)

Product Installation

STEP 1

Connect the supplied HDMI cable from your HD TV/display to the Output port of the HDMI switch.

STEP 2

Connect the power supply to the video switch.

Product Installation

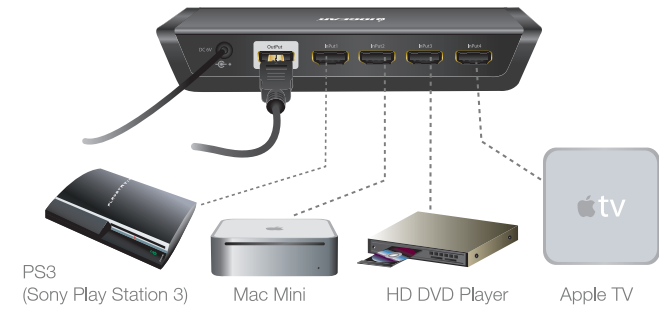

STEP 3

Connect an HDMI cable from the 1st HDMI source to the Input 1 port of the HDMI switch.

STEP 4

Repeat Step 3 for Input 2, 3 and 4 ports as needed.

You are now able to switch between your HDMI sources by turning on the device. The switch will switch to the last device turned on, if you wish to jump back to the previous device simply push the override button on the front of the device or power off the other device or use the switch remote. A blue LED on the front of the switch will indicate the selected video source.
