Overview

Local Unit

1. VGA Input Port
2. VGA Output Port
3. Extension Input/Output Port
4. DC Power Jack
5. Power LED

Remote Unit

1. VGA Output
2. Video Gain Control Switch
3. Extension Input/Output Port
4. DC Power Jack
5. Power LED

Installation

Note: Make sure your source device and all displays are powered off before you start.

Step 1
Plug the power adapter to the power outlet and the power jack of the VGA Extender (Both Local and Remote Unit)
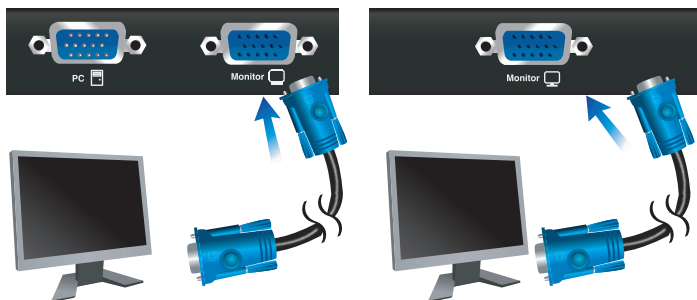

Step 2
Connect a provided VGA extension cable (Male to Female) between your video source's output (Male connecter from the cable) and the local unit of the VGA extender's input port (Female connecter from the cable)
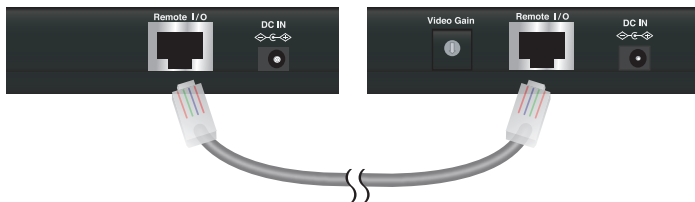

Step 3

Connect VGA Male to Male cables between your displays' input ports and VGA extender's output ports (Both Local and Remote Unit). We suggest using two equivalent model of display on local and remote unit to ensure the user experience.

Step 4

Connect a solid CAT5e/6 cable between the local and remote unit of the Extension Input/Output Port

Final Step

Turn on your source device and displays

Video Gain Control Switch*

Setting	CAT5e/6 Cable Length (meters)
0	No longer than 150
1	140-150
